Amendments to the Specification:

Please replace the paragraph beginning on page 2, line 8, with the following amended paragraph:

However, the CSS properties are not associated with the operating system of the computer. As such, if the architecture of the operating system is updated, which may include updated controls, the web pages or HTML-based applications utilizing CSS properties will not get any benefit from such ~~and~~ an update. As the operating system is updated or changed, it is difficult, if not impossible, to coordinate the look of the web pages created with the operating system. Therefore, while CSS Properties allow an author to create an appearance that is cohesive across a created website or HTML-based applications, they do not allow an author to utilize controls that are consistent with other websites and with the operating system.
